A musical project in which we can listen to the compositions of Fetén Fetén with a range of timbres and colors that the marching band arrangements provide. A fun and up-close staging that, along with the sounds of Fetén Fetén's unusual instruments and combined with the timbral palette of the band's instrumentation, allows one to travel through popular rhythms and melodies that make this duo unique.

The band arrangements of the Fetén melodies are created by Pascual Piqueras, an arranger who previously collaborated with the group in their show “Symphonic Fetén” which premiered in 2013 along with the OSBU (Burgos Symphony Orchestra). It was also done in several educational programs and performed in concerts at the Miguel Delibes Symphony Hall in Valladolid alongside the OSCYL (Castilla & León Symphony Orchestra) in 2015, in Villach and Innsbruck in 2022, as well as in Frankfurt in 2023. The project premiered in June 2018 with the Getxo Band “Musikalia” under the direction of Ane Legarreta and is open to different band formations. It is offered under the musical direction of [Pascual Piqueras](#).

Fetén Fetén is much more than just a musical project created by Jorge Arribas and Diego Galaz, it is the language of the soul made into harmony. More than a thousand concerts offered around the world make up the professional career of Diego and Jorge, who dynamically take us on a journey through our own essence with these performances in a way that is fun and full of enjoyment for all types of audiences.
